Our Story

Established in 2007 by the mother and son team of Anita and Andrew Elliott, Drinique is a global supplier of luxury unbreakable drinkware based in Phoenix, Arizona. The Elliott family has a passion for producing top quality products made in USA. After two years of research and development, Drinique pioneered the use of BPA-free Eastman Tritan™ Copolyester in drinkware for the hospitality industry. Drinique has the true look and feel of glass and offers the world's first Lifetime Guarantee against cracking or breaking. Drinique products are ideal for hotels, restaurants, bars, and healthcare, as well as cruise lines and corporate technology campuses.

The Drinique team has collaborated with legendary luxury brands such as Fontainebleau, Wynn, and Hakkasan to develop many of their unique drinkware designs. In addition, Drinique produces an assortment of stock and custom metal trays for table and poolside service.

Drinique has recently launched a collection of sustainable Bento boxes under the <reus**me** name. These patented Bento boxes are modular and manufactured with a new sustainable version of Tritan that contains recycled content.

Drinique continues to be an industry leading innovator.

Stemless

2

Striking a balance between form and function, Drinique's Stemless Glass is perfect for all occasions. This brilliant design isn't just for wine, it's great for any cocktail or beverage.

With a weighty personality and hand feel, it may well be the most beautiful glass we've ever made. Now available in a wide array of colors.

Bentos

11

The classic bento box has been reimagined for the 21st century. These highly functional food boxes are perfect for a variety of hospitality, institutional and other high capacity settings where a top-notch customer experience is the guiding principle.

<reuse**me**

Project <reuseme

<reuse**me** creates sustainable food service solutions that are of value to customers, our community and the planet.

We help our customers rethink how to better serve sustainably, one reuse at a time.

Sustainability Built In

Bentos are made using recycled content.

Reuse is the ultimate form of recycling, but reusing recycled materials has an even bigger impact on your carbon footprint. Our modular, reusable Bentos are a green and affordable alternative to disposable take-away food containers.

Now, more than ever, you need materials that help your brand succeed as the world pivots to a more circular economy. Consumers want products that offer the same high quality they expect while “being Eco friendly.”

Bentos, Inserts & Lids

Four sizes of inserts and lids provide freedom to serve any cuisine no matter the settings. Guests will appreciate enjoying their meal in its purest form without sauces or food mixed together. Different color inserts can be used to prevent cross contamination for food allergies.

All Bentos and lids are dishwasher, hot-box, microwave, and freezer safe.

Lids should be loosely set on top of containers when microwaved.

Compact Storage & Shipping

Our Bentos are designed to consolidate tightly for easy storage. Bentos and inserts all stack to less than two thirds of their individual height. Little Bento design allows for air flow around parts when stacked.

12 Mini Bentos
stack to 9.7 in
or 25 cm

12 Little Bentos
stack to 12.5 in
or 31.8 cm

Customization

Curate premium, branded dining and entertainment experiences with custom branding and color options. Reinforce your sustainability goals with reminders to return items for reuse.

Safety & Versatility

Our products are proudly made in the USA with BPA-Free materials. Serve your customers solutions that offer peace of mind.

- < BPA-free, PFAS-free, and Phthalate-free
- < Formaldehyde-free (melamine)
- < Styrene-free

- < Sleek design allows for easy carry & transport

The extreme toughness of Tritan Renew® offers food prep and service options never before achievable with traditional hospitality products.

- < Shatterproof
- < Commercial dishwasher safe
- < Microwave safe
- < Freezer safe..... -40° C/F Max.
- < Hot box safe..... 185° F [85° C] Max.

Care & Use

Drinique works continually to provide customers with the optimal eco-friendly dishwashing recommendations for our Tritan™ products.

We always suggest you speak with your local Ecolab representative or dishwasher vendor to conduct a Total Dissolved Solids (TDS) water hardness test. Hard water is extremely corrosive and there are many contributing factors that can affect overall washing results. Dishwasher chemical recommendations vary for establishments depending on water hardness and if a high or low temperature dishwasher is in use.

The following Use Guidelines will help keep your Drinique Tritan™ products looking their best.

Ecolab is Drinique's preferred ware washing vendor. If using Ecolab, below are options available to support your ware washing program. To help with any concerns please reach out to your Ecolab Representative. Ecolab Customer service can be reached at 1-800-352-5326.

For specific commercial dishwasher chemical recommendations see the 'Care & Use' section of the Drinique FAQ page: <https://www.drinique.com/pages/faq>

Do Not Use

- < Detergents and rinse aids that contain phosphates, citric acids, and chlorides. Chemical provider can locate in their Material Safety Data Sheet (MSDS)
- < Sanitizers that contain phosphates and citric acid. Chemical provider can locate in their PDS.
- < Abrasive scotch pads or glass scrubbers that will cause scratching. If using a 3-Tier sink, use a cloth glass polisher instead of an abrasive glass scrubber.
- < A conveyer washer without a water tank change every 2 hours.

Do Use

- < Water Softeners produce better results, protect your wares and can also help your equipment work more efficiently and last longer.
- < Rinse out used Drinique Tritan™ products as soon as possible.
- < Air-dry drinkware before storage as required by FDA Food Code. A pyramid stack can be used to allow for storage and more time to air dry.
- < Polish glasses on a daily or at least weekly basis to remove any hard water or food protein buildup left over after washing.

Care & Use FAQ

How do I keep my Drinique Tritan™ products looking amazing.?

Drinique Tritan™ products are tough, but even though they are unbreakable, everything thrives when it's shown a little love...

1. Sunblock is great for your skin but it's actually harmful to plastics. After applying sunblock, be sure to wash your hands before you grab your drink.
2. Essential Oils might smell good, but they can 'tarnish' or create a haze on high clarity food grade plastics. Avoid prolonged contact with beverages that contain fresh squeezed vegetable or fruit juices, including citrus and citrus rinds. Briefly rinsing with water immediately after use is recommended.
3. Like glass, plastic can scratch, so avoid using anything abrasive to clean or wipe off your Drinique Tritan™ products. A soft sponge and kitchen towel to dry will keep it looking beautiful.
4. Don't fear the dishwasher! All of our Drinique Tritan™ products are dishwasher safe and do great with the added help of a rinse aid like Jet Dry.

Can I put my Drinique Tritan™ products in the dishwasher.?

Yes! For sure on the top rack, and as long as your dishwasher doesn't have an exposed heating element on the bottom, you can safely wash them on the bottom rack as well.

Make sure you check, many residential dishwashers do have exposed heating elements.

What dish detergent do you recommend.?

Traditional Cascade and Finish brand dish detergents do an excellent job. We also recommend using a rinse aid, like Jet Dry, especially if hard water is an issue.

Can I use heated wash and dry cycles.?

Yes, we do at home and our Drinique Tritan™ products comes out spotless every time! Just make sure to keep your Drinique drinkware on the top rack if your dishwasher has an exposed heating element at the bottom.

Should I be using a water softener.?

Yes, we recommend a water softener whenever possible. Hard water is extremely corrosive and will dull glass, plastic and metal products.

Can I microwave my Drinique Tritan™ products.?

Yes. Drinique Tritan™ products are BPA free and microwave safe, however we recommend limiting cycles to two minutes at a time. Prolonged microwave use can degrade Tritan™ products.
