Drinkwise® Care & Use Instructions:

We recommend the following to maximize the performance of your Drinkwise® items:

DO:

- **DO** wash Drinkwise® in commercial dishwashers.
- **DO** wash in water temperature up to 140° F, and rinse in temperatures not to exceed 180°F.
- **DO** use *mild* and *non-abrasive* dishwashing detergents and rinse agents that are recommended for plastics.
- **DO** use lime scale remover once every 500 cycles to prevent “hard water” stains and to ensure no chemical (detergent) buildup.
- **DO** wash and store Drinkwise® in glassware racks (not peg racks!) of adequate size to prevent scratching.

DO NOT:

- **DO NOT** use abrasive cleaners, scouring pads, brushes or steel wool - they will cause scratches.
- **DO NOT** use utensils with sharp edges as they can scratch or scuff the surface.
- **DO NOT** cook in Drinkwise®. Although Drinkwise® is made of microwave safe materials that can be used to reheat foods, Drinkwise® is not intended for cooking.
- **DO NOT** microwave Drinkwise® with foods high in salt, oil, fat, sugar, carrot or tomato to avoid staining.
DO NOT let staining foods like carrot or tomato sit in Drinkwise® items for prolonged periods of time or in extreme temperatures. Rinse and wash immediately after use.
- **DO NOT** use in conventional ovens, convection ovens, under browning elements or directly on stove top.

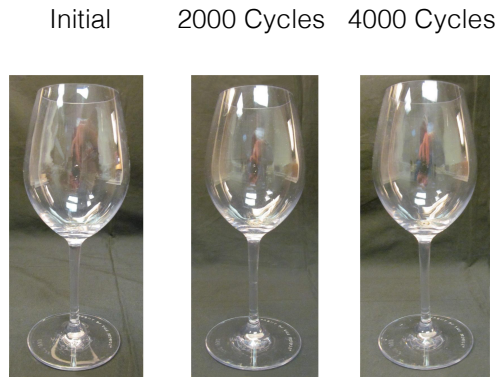

Recommended products to clean Drinkwise®:

Liquid Detergent: Ecolab Ultra Klene

Powder Detergent: Solid Power XL

Rinse Aid: Ecolab Ultra Dry or Solid Brilliance

Using the recommended products can prolong the life of your investment. Results as:

*This test accounts for chemical compatibility and does not account for wear associated with usage

Although Drinkwise® is designed and engineered for commercial environments, hard water buildup or food stains may occur if Drinkwise® is not cared for properly. When serving foods that stain easily - soak Drinkwise® in hot soapy water, rinse and wash immediately after use. If possible, it is recommended to not handle Drinkwise® with sunscreen on your hands.

Solutions to Remove Hard Water Buildup/Lime Scale Staining

- Soak Drinkwise® in a solution of 1 part household bleach to 4 parts water for 25 minutes. Rinse well in hot water immediately after. Proceed with standard dishwashing procedures.
- Pour Meguiar's Mirror Glaze #17 directly onto Drinkwise® and let sit until *fully dried*. Once solution appears flaky, use a paper towel to buff off, then rinse. Proceed with normal dishwashing procedures.

Solutions to Remove Sunscreen Fingerprints

- Rinse Drinkwise® with water prior to dishwashing to remove sunscreen residue. Proceed with standard dishwashing procedures.
- If fingerprints are still visible, it is recommended to use Meguiar's Mirror Glaze #17 following the same instructions for use above.
