

Platewise® Care & Use Instructions:

We recommend the following to maximize the performance of your Platewise® items:

- DO remove leftovers with a rubber scraper
- DO wash Platewise® in dishwashers
- DO wash in water temperature of 160° F
- DO rinse in water temperature of 180° - 185° F, **NOT** to exceed 185° F
- DO use mild/nonabrasive detergents and rinse agents
- **DO NOT** wash Platewise® with abrasive cleaners, scouring pads, brushes or steel wool, which will degrade the surface
- **DO NOT** put Platewise® items under heating lamps

Recommended products to use with Platewise®:

- Liquid Detergent - Ecolab Ultra Klene
- Powder detergent - Solid Power XL
- Rinse Aid - Ecolab Ultra Dry or Solid Brilliance

Although Platewise® has been designed and engineered for commercial environments, if left sitting dirty with the following items over a long period of time, staining may occur:

- Blackberries
- Raspberries
- Curries
- Black Beans
- Red Chili Oil
- Coffee
- Blueberries (*Dip-It* is recommended specific to blueberry staining on Platewise®.)

To remove staining, it is recommended to use a solution of 25% bleach and 75% water. Let items sit for 5-15 minutes, depending on the severity of the stain; rinse and dishwash immediately. In addition, *Mr. Clean Magic Eraser* can be used to remove metal markings on the bottom of Platewise® items.

25% Bleach and 75% Water

Results of Stain Removal for 10 minutes
