

INTRODUCING THE MiSA™-a12

Save labor and improve food quality and consistency with this rapid cook microwave oven, featuring the fastest cooking time and largest footprint-cavity ratio in market.

SUPERIOR COOKING PERFORMANCE

- Cooks up to 10x faster than conventional ovens, resulting in a 90% reduction in cook time
- Higher warmup power, airflow and microwave power output than any other rapid cook unit in the market - and still uses less energy
- Patent pending cook plate technology to give even browning on the bottom of food products

CONSISTENT QUALITY

- Store 1,000+ pre-programmed recipes, each featuring up to three stages of cooking based on time, temperature, blower speed and microwave power

MiSA™ stands for Microwave Speed Assist - That's right - microwave. This technology outperforms other rapid cook units in the market and does it quietly.

OPERATOR FRIENDLY

- Full-color 7" touchscreen display makes it easy to access 1,000+ pre-programmed recipes
- Easy to clean design features non-stick inner cavity and removable trays that are dishwasher safe
- USB port makes recipe uploads, cook log downloads, service diagnostics and software updates easy
- Flexibility of accessories - you can use any oven-safe pan
