

STEP 1

Pour and arrange charcoal in grill to desired amount

STEP 2

For every pound of charcoal dispense gel into tablespoon size dollops near the **base**. Roughly 5 dollops per pound of charcoal

STEP 3

Use long-handled lighter to ignite the gel

STEP 4

Let coals burn until all are white on the surface (should take about 15 minutes)

STEP 5

Use long-handled tongs to spread the coals evenly across the bottom of the grill

Never add Sterno Multi-Purpose Firestarter to hot coals to get a sluggish fire going again
