MVP & MVP HYDRA

Say it with Synesso.

THE COFFEE PROFESSIONAL'S PRECISION WORKHORSE

Synesso's flagship MVP and MVP Hydra commercial units are the go-to workstations for demanding coffee professionals in need of complete control of their craft.

Both units offer intuitive control of espresso parameters like temperature and pressure that yield the industry's very best extraction control.

The MVP Hydra model features independent pumps and brew-boilers, making it a true high-volume unit.

No matter the choice, both offer Synesso's famous build quality, premium components, and long-life reliability owners can trust to perform year-after-year.

Various customizable panels, group-heads, and handles

MVP HYDRA

Stainless steel construction & premium quality internals

KEY BENEFITS

- Dial-in and save your recipes with Manual, Semi, and Full Volumetric modes.
- Explore your espresso extraction with 4-stage pressure control. Then save the recipe and repeat it again and again.
- Increase speed of service while maintaining extraction quality via independent pumps,* brew-boilers,* and volumetrics that drive your programmed profiles.

PERFECT FOR

- High volume shops with busy bars
- Specialty cafés curating unique beans and creative drinks
- Owners who need reliability, repairability, and long-term value

WARRANTY-BACKED QUALITY

- Lifetime on group-head components
- Extended parts warranty

Cool-touch steam wands

Hand-held controller to dial-in parameters

*MVP Hydra model only
