Introducing the

C-SERIES UNDERCOUNTER BLAST CHILLER

Simply designed. To be the best. For you.

The C-Series Undercounter Blast Chiller is a great way to optimize your kitchen workflow and save time. With features that are simple-to-use, this blast chiller requires minimal staff training and allows you to easily cool large batches hot food in advance without compromising quality or safety standards. It provides operators with two chill mode options to suit different menu needs:

✔ Soft Chill

A gentle chilling process designed for delicate applications such as refreshing ready-to-eat foods or chilling foods with high water content to preserve the integrity and flavor of the food.

✔ Hard Chill

Suited for denser foods, the hard chill cycle uses advanced cold air circulation to quickly remove heat from the food product so that product safely chills without losing quality.

For time and cost savings in your kitchen, count on the C-Series Undercounter Blast Chiller.

Digital control
designed for easy operation
