

INSTALLATION PROGRAMS

Blodgett Combi offers a **worry-free installation program** designed to make your installation as easy as possible. You will be creating sumptuous cuisine in no time! Blodgett Professional Installation program offers a turnkey solution from delivery to product demonstration. More than you need? All Blodgett Combi ovens also come standard with a Factory Paid Startup (see below for details).

BLODGETT PROFESSIONAL INSTALLATION

WORRY FREE COMBI INSTALLATION

The Blodgett Professional Installation Program is designed to offer our customers a worry free installation and start up experience when purchasing any of our Combi ovens. It includes: Site survey, Installation, Connection of Utilities and Start up. Installation is provided by a Blodgett Authorized Service Agent and is available for Combi ovens at time of purchase.

* Blodgett Combi Mini models not included

HOW DOES THE PROGRAM WORK?

- Add the Blodgett Professional Installation Program option (if chosen) to the purchase order with the following required information:
 - End-user name
 - End-user ship to address
 - End-user contact email
 - End-user contact phone
- The ASA will contact the end-user to arrange site survey, installation and start-up.
- When complete, contact your local Blodgett manufacturing rep to schedule a free chef training (included with every combi purchase).

CUSTOMER PROGRAM RESPONSIBILITIES

The customer is responsible for providing the following prior to installation:

- A water treatment system, if required to meet the factory water quality requirements. Installation of a water treatment system must be done prior to oven installation, and is NOT included with this program. Refer to 64 for information on Blodgett water quality requirements and water treatment options.
- 1/2" treated cold water line installed within 2' to 3' maximum from the rear of the oven. If a water treatment system is installed, the water supply must come from that system.
- Untreated water can be used for hand shower and quench
- Electrical disconnect and/or connection point within 2' to 3' from the rear of the oven
- Gas Oven Only - Gas service with a shut off within 2' to 3' from the rear of the oven
- An approved floor drain within 2' to 3' from the rear of the oven
- Drain cannot be under oven
- An approved and operational ventilation hood

1

SITE SURVEY

1. The ASA will conduct a site survey to assure all requirements for a worry-free installation have been met. If there are any anomalies, the ASA will document and present them to the customer. The customer is responsible for resolving any non-compliance at the site prior to equipment delivery.

2. Additional charges may be applicable for non-compliance.

***Once the site survey has been completed, the PO will be assigned a ship date and put into production

2

SHIPPING

1. Once the site survey has been successfully completed and the site survey form has been received and cleared by our service team, the equipment is shipped to the Food Service dealer's designated location listed on the purchase order.

(advanced shipping available on special request, see terms on previous page)

3

INSTALLATION

1. The ASA will uncrate, stack the combi if necessary, assemble stands and set in place.

2. The ASA will remove and dispose of all shipping material.

3. Removal and disposal of existing equipment is not included.

4. The ASA will complete the final assembly of the oven.

5. Installation of a water treatment system is NOT included with this program.

* Note: This needs to be completed before the ASA arrives to install ovens.

4

CONNECTING UTILITIES

1. Connect Gas: The ASA will connect the gas hose from the oven to an appropriate gas line connection.

2. Connect Power: The ASA will hook up the oven to an approved disconnect device.

3. Connect Water: The ASA will connect the water hose to the appropriate water feed connection point.

5

START UP

1. The ASA will perform a Factory Start Up according to Blodgett recommended procedures.

2. The ASA will complete the Start Up form.

3. The ASA will send the form to Blodgett.

DISCLAIMER:

A Pre-Installation Site Survey is necessary for all **BX, BCX, BC** and **INVOQ** models and can also be purchased separately upon request if needed (for dealer use only). This process ensures the site has proper space and connections for gas, electric, drain & water and is 100% compliant to our equipment requirements. New received Purchase Orders will automatically be processed in our system and be given a final ship date only upon successful completion & submission of the Pre-Installation Site Survey (checklist form also available at Blodgett on demand).

NOTE: Advanced shipping can be arranged upon a customer's specific request, meaning that we could still ship out a unit upon receiving a PO (if requested so), but it will need to be at the client's own risks, **and any returns/restocking fees/modifications required as a result of missing or inadequate site inspection will result in full financial responsibility incurred by the dealer/KES partner.**
